FROM 6 MM

PROSTHETIC CONSTRUCTION SIMPLE AND RELIABLE

BETTER STRESS DISTRIBUTION ON THE IMPLANT

Conical shoulder at 45°
for prosthetic support.

SIMPLIFIED PROSTHETIC RANGE

Flangeless prosthetic parts : the choice
of different flange heights or shapes is
no longer necessary.

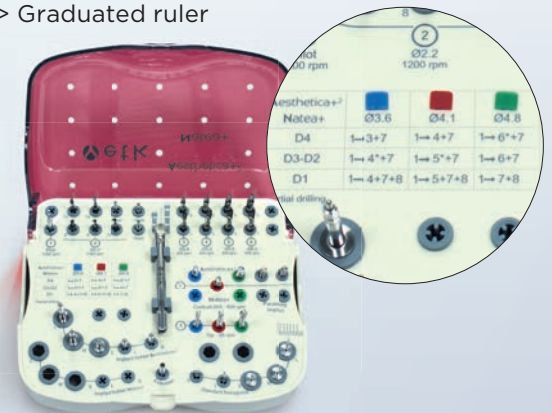

SINGLE PROSTHETIC SEAL (A)

- Better sealing.
- Better stability of the entire assembly.
- Better aesthetics management.

SURGICAL KIT SIMPLE AND CODIFIED

- > Guided protocols
- > Numbered drills
- > Illustration of instruments
- > Color codes for diameters
- > Graduated ruler
